Superfluous Hair Removed by Electrolysis

OVER two score years ago, Dr. Mitchel, oculist, of St. Louis, evolved a method of using electricity for the permanent removal of ingrowing eyelashes. Soon after, his friend, Dr. Hardaway, conceived the idea of using this method for the removal of Superfluous Hair from the human face. Today, physicians, everywhere, recommend this method as the only sure way of obtaining permanent relief from this annoying condition.

For nearly thirty years this office has employed *this* method—*the* method discovered by one, and employed by ALL the old masters, the single electric needle process, in painlessly disposing of these disquieting blemishes *for all time.*

You are invited to phone, write or call for complete information and demonstration sitting without obligation.

	Capacity in Gallons
Borden Brook Reservoir (impounding),	2,500,000,000
Intake Reservoir (diverting),	40,600,000
Sedimentation Basin (before filtering),	38,700,000
Provin Mountain Reservoir (after filtering),	17,000,000
Total,	2,596,300,000

The former supply from impounding reservoirs in Ludlow and Belchertown is also retained at present for town of Ludlow and for emergency uses, and, with its storage capacity of 1,434,218,000 gallons, makes an aggregate available storage capacity of 4,030,518,000 gallons.

Range of pressure on mains for day and night as follows: Main street level, maximum, 147 pounds, average, 140 pounds. Hill section level, maximum, 87 pounds, average, 80 pounds.

The entire supply of city water to any premises is furnished by meter only and at meter rates; the necessary meters are installed by the water works at the expense of the consumers for the initial cost of the meters and connections only.

The cost of ordinary care and repairs of all meters is borne by the water works; the cost of unusual repairs (necessitated by freezing, not water, etc.) due or attributable to any carelessness or neglect on the part of the consumer, will be charged to the consumer or owner.

Meter Rates

(Subject to all rules and regulations.)

For each 100 cubic feet (748 gallons) of water as registered or estimated for each independent premises* the rates shall be as follows:—

For the first 5,000 cubic feet or less per quarter, at 22 cents per 100 cubic feet (about 30 cents per 1,000 gallons).

For all excess over the first 5,000 cubic feet per quarter, at 5 cents per 100 cubic feet (about 7 cents per 1,000 gallons).

Where the aggregated total use for one independent premises* amounts to 750,000 cubic feet or more in any one quarter, the entire quantity will be charged at 5 cents per 100 cubic feet.

Subject to the following minimum quarterly charges:—

(a) Single dwellings, and double houses or blocks (of two or more ground-floor single-tenement sections), each tenement not less than $2.00 per quarter.

(b) Tenement houses, apartment blocks, etc., each tenement or apartment not less than $1.50 per quarter .

(c) Business blocks, manufactories, and other industrial plants, elevators and motors, each bill for each independent premises*, not less than $2.50 per quarter.

Special for Elevator Uses—Where the total or aggregated quantity for operating one or more elevators on each independent premises* amounts to 33,000 cubic feet or more in any one quarter, and is metered and billed independently of all other uses, the entire quantity will be computed at 5 cents per 100 cubic feet; but no bill hereunder shall be rendered at less than $25.00 per quarter

*Business and industrial buildings of more than one section, and adjoining or adjacent, buildings, under one independent ownership as a **plant** (if not separated by a street or by any other buildings or premises under another ownership), may be considered as **one independent premises**, and, as such, subject to the computing and billing of the foregoing meter rates. In all other cases the supply through each service and meter shall be computed and charged as separate and independent bills.

Each quarterly period will be computed and charged for independently of any other quarterly period, and the rates therefor shall be paid accordingly.

When a meter from any cause fails to register the consumption of water, the quantity shall be estimated and the charge made based upon the registration by the meter when in order, or upon the registration for a corresponding prior quarter or period.

Builders' Uses—Where water is to be used in the construction of ordinary framed buildings, or for small building operations where the use may be easily estimated, the meter installation may be temporarily deferred, as an accommodation to the owner or builder, until the completion and occupancy of the building, and a nominal estimated flat rate may be charged for builders' use of water to the owner of the property, who will be held responsible for such use and the payment of such charge.

The Water Registrar and the Supt. shall determine all cases where the foregoing provisions may apply, and each case shall be considered independently of any other, but no such estimated charge shall be less than $1.00.

Miscellaneous and Temporary Uses—In certain cases of miscellaneous and temporary uses of city water, where the quantity used may be small, the charges for same may be estimated instead of being shown by meter, at the discretion of the Water Registrar and the Supt.

The Water Registrar shall have the right to require an advance deposit as security for the payment of water bills, when he shall consider it for the interest of the city to do so; such deposit not to exceed a year's minimum rate for the property to be supplied or a reasonable estimate of the probable annual amount of such bills.

All bills due the City on account of the water works shall be payable at the office of the City Collector, Room 137, Municipal Building Court and Pynchon streets **within twenty days** after the same are rendered and become due.

The object of the Salvation Army is to carry the Gospel of the Lord Jesus Christ to the thousands who today never darken the doors of the places of worship and to bring the Bible message to the outcast of society, whether in prison or brothel or any place harboring vice, iniquity or intemperance.

When a hungry man is given a meal, or a worker visiting a slum home with a basket of life's necessities, Thanksgiving or Xmas dinners given to the poor, it is not only to relieve an immediate need, it is for a higher purpose of bringing them the message of the Gospel of Light and Love, that the recipient of the humble gifts may think of Him who was rich, but for our sakes became poor and took upon Himself the form of man, and by paying the debt of sin made it possible for us to be reconciled with the Father by the gift of Himself.

Our constant effort is to help others to help themselves; eventually they too become helpers to others.
